

# No Nukes for Iran

Iran's nuclear program represents a serious and immediate threat that can't be left unchallenged. Iran's President Ahmadinejad has called for wiping Israel off the map, and Iran is the biggest backer of terrorist groups Hezbollah and Hamas that have launched more than 8,000 rockets and missiles at Israeli civilians. Iran now promises to share its nuclear technology with others, which will likely get in terrorists hands.

**Iran will share nukes:**

**Hamas**

**Hezbollah**
